Experience

Trudan Spa   San Francisco, United States
Game Studios developing a turn based creature collecting MMORPG
Software Engineer   Apr 2022 - May 2023

- Implemented matchmaking and a "versus" system for battles in our game using *nest-js*, resulting in 4500 battles during the first launch week.
- Created a service that dynamically generates media assets (images, gifs, and videos) for our collection of 6000 beasts.
- Developed a reward system based on game results and probability-based prize rewards.
- Built the first version of our web platform from scratch using *react, chakra-ui, typescript* and *remotion*.
- Implemented *CSS* animations and the logic for the initial version of the kuroro game using only *react*.

GoBioBridge   Miami, United States
Revolutionizing Remote Patient Monitoring for Heart Disease Care
Full-Stack Engineer   Mar 2021 - Apr 2022

- Automated the data collection for 12,000 patients across 6 clinics in the USA, utilizing webhooks on our Rails platforms.
- Migrated 20 Google forms to our web platform, designed the data modeling with *rails* and implemented the interfaces with *react*.
- Developed dynamic reports for each patient based on the brand of the cardiac device they were using, all while ensuring a customized design for each clinic.
- Implemented a review process that included physician signatures for monthly patient reports at each clinic.

Able   New York, United States
Product acceleration studio for serial entrepreneurs in Silicon Valley
Software Engineer   Sep 2019 - March 2021

- Worked on a volunteering platform to mobilize lawyers across the USA using React and Rails.
- Alleviated technical debt by doing refactors, introducing new dependencies and improving the performance application.
- Implemented new user-facing flows from scratch.
- Updated our platform to rails 6.

LWP DEVELOPERS   Lima, Perú
Local Agency
Full-Stack Developer   Aug 2017 - Feb 2019

- Built user interfaces with the React library,
- Developed robust and efficient APIs utilizing Ruby on Rails,
- Took the initiative to train and mentor team members in the latest web technologies, including Rails, Vue, React, Node, Docker, and more

Education

PERUVIAN UNIVERSITY OF APPLIED SCIENCES   Tingo María, Peru
Software Engineering   2017
